PROFESSIONAL EXPERIENCE

Frontend Engineer, PayNearby: **(September 2022 – Present)**
- **Optimized the UI development process,** resulting in the accelerated development of critical revenue-generating modules such as (DMT) Money Transfer and (AePs) Aadhaar Enabled Payment System.
- Played a key role in developing **internal tools** that significantly enhanced employees' productivity at PayNearby.
- Identified and implemented **local storage**, achieving a significant reduction of **API calls by over 100,000**.
- Implemented **micro-frontend architecture** using Angular libraries.

Frontend Engineer Intern, PayNearby: **(June 2022 – September 2022)**
- Created a custom design system in Angular, leveraging Angular Material, resulting in an impressive **80%** reduction in **UI development time**. This significantly enhanced efficiency and productivity for the team.
- Streamlined the process of **UI development** by transforming product manager's concepts and designer's design into working prototypes, ultimately expediting development and yielding impactful outcomes.
